My personal interest is Startups. I have experience in working on 4 startups where one of them gained Avatech investors approval in cycle 4 . Even more, I have 5 years experience in android programming and I am skilled at web programming based on MERN Stack (MongoDB - ExpressJs - ReactJs - NodeJs) as well. About a year ago I started to develop a product for intelligent pricing and product price recommender with MERN. It is notable that my experience and knowledge in this field pulled me towards planning connections between technical teams and businesses. I have been also following SEO and digital marketing and I have sufficient knowledge about their technology and Tools.

📁 Professional Experience

- | | |
